Project : Personal Expense Tracker

Personal Expense Tracker is a web-based application built using oracle apex

It contains two databases one to track expenses and another to track income

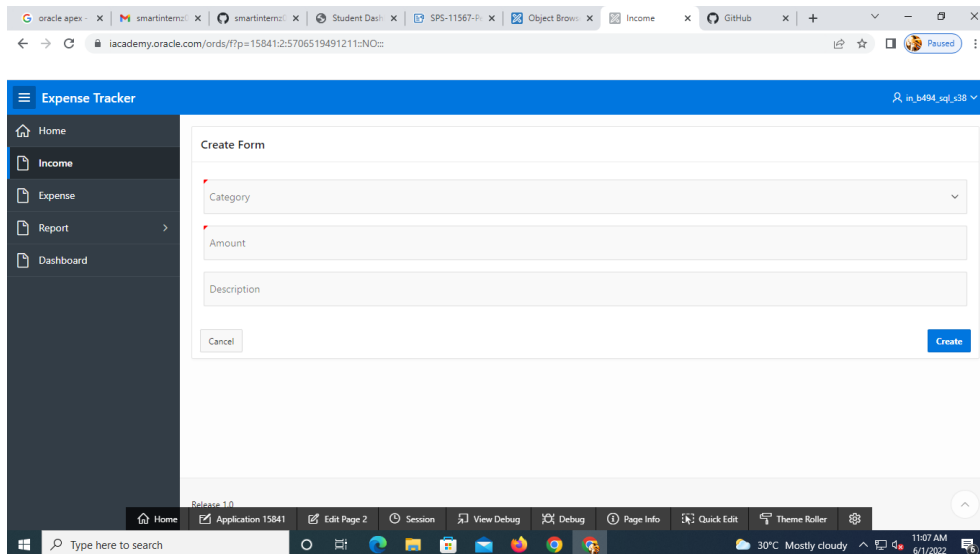

It has several pages
1) A page to insert data into income table
2) A page to insert data into expenses table
3) Reports page which displays information in both the tables
4) An interactive dashboard with bar graphs and pie charts to give user information about expenses and
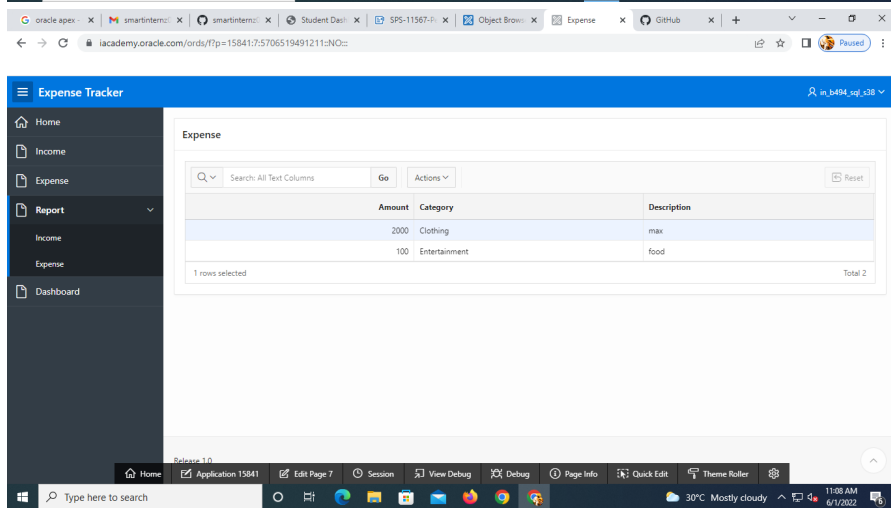

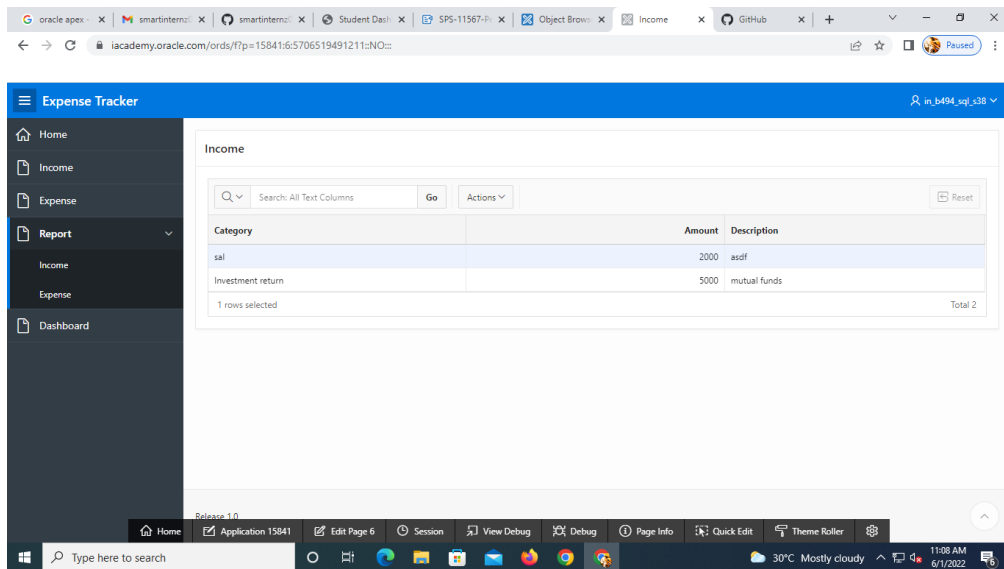

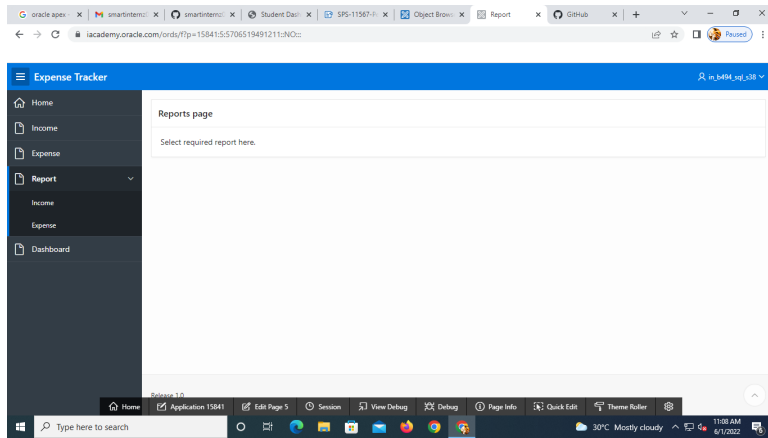

income

1) Page to Insert data into income table

2) Page to insert data into expenses table

3) Reports Pages
